

# Engineering Technology Certificate in Mechanical Design

Engineering Technology  
Certificate in Mechanical Design

Engineering Technology  
Certificate in Mechanical Design  
This program is designed to provide students with the knowledge and skills necessary to enter the workforce as a mechanical design technician. The program includes courses in mechanical design, computer-aided design (CAD), and manufacturing processes. Students will also receive hands-on training in a machine shop and a CAD laboratory. Upon completion of the program, students will be prepared to work as mechanical design technicians in a variety of industries, including manufacturing, construction, and maintenance.
